

## Lick Granuloma

Dr. Bob Gilbert Fort McMurray Animal Hospital Fort McMurray, AB, Canada

8/22/06

Patient: Canine (atopic canine) Problem: Lick Granuloma – Long time condition Previous Therapies: None

8/24/06

K Laser Protocols: Wounds C5, Wattage 2  
Treatment Frequency: 5 treatments 8/22, 8/24, 8/28, 8/30, 9/5 Additional Treatments: Follow-up if needed Medications: 20mg Depo-medrol (atopic canine)

9/5/06

Outcomes: We are very pleased with the results to this point, in that this sore was present for such a long time prior to treatment. It appears to be completely resolving with 4 treatments...2 more are scheduled.

Prognosis: Good
