

Chronic Shoulder:

38 years of pain and loss of motion

Patient: male age 58

Problem: At age 20 the patient had motorcycle accident and for 35+ years has had a limited range of motion and a chronic R shoulder problem. He has seen several different types of doctors over the years and the problem could not be resolved. The patient had resigned to live with the loss of motion and the pain.

Previous Therapies: ultra sound, sine wave, extremities adjustments, chiropractic, physical therapy,

K Laser Protocols: B1: Shoulder pain protocol with approximately 633 joules applied to posterior, superior shoulder as well as shared with the right trap.

Treatment Frequency: The plan was to do a pain protocol and see what changes in the ROM would occur

Outcomes: Improved after one Klaser treatment

Additional protocol added : On same day at 5 min after administering the B1 protocol we added the Systemic Muscle Fatigue E5 protocol and utilized the Klaser Super pulse on the anterior deltoid, the scapula , and its borders as well as the trap extending from the neck to superior shoulder.

Outcome: immediate additional improvement

Patients comments: “ I cant believe how much pain is gone, it hasn’t felt like this since before I injured it 38 years ago. This is amazing.”
