

July 2011

"As a Tournament Angler I was experiencing elbow pain after hours on the water from casting and hook sets. This began to really become painful even to the touch. That was until I heard about "Laser Therapy", and yes I was skeptical, however I made an appointment. Especially since it came from a true friend and also one of best West Coast Anglers ever, Gary Dobyys. After my first treatment which took all of about 20 minutes, I can honestly say that my elbow was no longer sore to the touch and felt better than it had in months! I continued to see Dr. MCGinnis for 2 follow up appointments and afterwards my pain was nearly non-existent and I was at about 90% overall. The bottom line is this procedure WORKS!! You want to get rid of those Joint aches and pains that all fisherman typically experience over time, then you better make sure you see Dr. J Rod MCGinnis.

Best,

Keith Reed
